

Individual Final Project

WRAP FEWD Fall 2021

Due Date: February 16th, 2022

Restaurant Website

Build a website for a restaurant of your choice. This could be an existing restaurant or a restaurant that you create. I want you to build a multi page website. I would like at least 3 pages. Use HTML and CSS to build your website. JavaScript is optional if you would like to add that functionality. Add your own personal touch to this site.

Please follow the same guidelines as the group project about outside resources and their use in this project.
